CBRN Research & Innovation Conference

TAKE THE OPPORTUNITY TO LEARN MORE ON FUTURE TRENDS & NEW TECHNICAL CHALLENGES ON CBRN!

Recent history has demonstrated that both military and civilian populations could be exposed to highly hazardous Chemical Biological Radiological and Nuclear (CBRN) agents following conflicts, natural catastrophes, industrial incidents or terrorist acts...

Worldwide, research and industrial capacities have been engaged to provide adapted answers to these new challenges.
Besides existing CBRN conferences, we felt that a specific communication space should be dedicated to Research and Innovation.

This conference will give a unique opportunity for researchers to establish or strengthen collaborative relationships.
